

SEAT FOR SPORTS FACILITIES

MODEL SO-05

PRODUCT DESCRIPTION

- ▶ the chair is manufactured by injecting high-quality stabilised polypropylene
- ▶ the surface of the seat is smooth and ensures safety as well as comfort of use by ergonomic profiling and rounding of the edges
- ▶ additional ribs in the seat and backrest improve the structural properties of the chair
- ▶ the cover in the rear and bottom part of the seat prevents rubbish against falling under the chair
- ▶ special chemical additives increase the chair's resistance to high and low temperatures as well as UV radiation
- ▶ water drainage outlet is located in the central part of the chair
- ▶ easy mounting to a metal construction with 2 screws or to a concrete foundation with 2 rawlplugs eliminates the necessity of using other additional supports
- ▶ the fixing places in the seat are covered with two end caps
- ▶ a metal number plate can be mounted in the upper part of the backrest
- ▶ the chair can be fixed to the metal structure of a stand or to an independent standing or suspended metal construction
- ▶ backrest height: 25 cm

The chair is certified and approved:

**it is provided with slow-burning,
toxicity and durability expert opinions**
